INDUSTRIES — MEDIA, FINTECH, HEALTH

Senior Full-Stack Engineer and Solution Architect with **11+ years** designing and scaling **React, React Native, and Node.js** products — from zero-to-one MVPs to production platforms across media, fintech, healthcare, and marketplace startups. Owned system architecture end-to-end on **20+ shipped products** and led engineering teams of **up to 10+ members**.

React.js	React Native	Node.js	Next.js	TypeScript	Expo	Angular	Redux / Redux Saga	GraphQL / Apollo	Vue.js
MongoDB / PostgreSQL / MySQL									

EXPERIENCE

Cross-platform media streaming app — radio, podcasts & news (iOS / Android / Web)

2024 — 2026

Senior React.js / React Native Engineer | Solution Architect · LITSLINK client engagement (under NDA)

- A media app spanning radio, podcasts, news, and jobs needed one coherent codebase instead of scattered one-off features — solved with a modular Expo Router + TypeScript architecture built to scale as content types grew.
- Live radio listeners expect zero friction — solved uninterrupted background playback and control with react-native-track-player, a swipeable mini-player, and custom Android media notifications.
- Multiple content feeds risked slow, janky loading as usage grew — solved with an Axios + TanStack Query layer with caching and pagination to keep the app responsive at scale.
- Sign-up friction is a leading cause of drop-off on media apps — solved with one-tap OAuth2 via Apple / Google / Facebook and persisted sessions, removing repeat logins.
- A four-market audience (SR/EN/FR/DE) needed the app to feel native everywhere — solved with full i18n and runtime language switching, no reinstall required.

Stack: React Native, Expo, TypeScript, Expo Router, NativeWind, TanStack Query, Zustand, Node.js

AI web platform — voice recordings → text via ChatGPT

Dec 2023 — Feb 2024

Senior React.js / React Native Engineer | Solution Architect · LITSLINK client engagement (under NDA)

- Founders needed to test a brand-new AI product on both web and mobile without picking one first — solved by architecting both platforms from scratch in parallel, before a dedicated designer was even in place.
- Manual transcription is slow and error-prone — solved by integrating the ChatGPT 3.5 API to convert recordings directly into usable text.
- Pre-launch, the priority was fast validation over polish — solved with daily build-test-learn cycles to pressure-test features before committing further engineering time.

Stack: React, React Native, Expo, Redux, Node.js, MongoDB, Express

Apartment booking & rental platform — Airbnb-style marketplace

Sep — Dec 2023

Senior Full-Stack Developer · LITSLINK client engagement (under NDA)

- The product needed a full-stack foundation built from zero — solved by owning the technical architecture across both front-end and back-end.
- Coordinating apartment viewings across renters and agents is a scheduling headache — solved with a dedicated viewings calendar, in-app notifications, and messaging to keep everyone aligned.
- A growing feature set risked slipping code quality — solved with targeted performance optimization and code reviews to keep the codebase maintainable as it scaled.

Stack: React, Node.js, MongoDB, Express

Music-tech streaming platform — sharing exclusive tracks

Jul — Sep 2023

Senior React.js Web Developer · LITSLINK client engagement (under NDA)

- A music-tech startup needed a listening experience on par with mainstream players, built from nothing — solved with a custom web player (volume control, track switching, queue) built from scratch.
- The business needed a path to monetize beyond ads — solved with a track rating system and premium subscription tiers with in-app roles to support a freemium model.

Stack: React, Redux

EARLIER EXPERIENCE (2016 — 2022)

2022	Private media-sharing app — Senior React / React Native Dev, Instagram-like with premium features	React Native, Redux, Node.js
2022	Crypto education platform — Senior React.js Web Dev	React.js
2021	AI music mastering & distribution platform — Senior React Dev	React, Redux, GraphQL
2021	Dating app — Senior React Native Dev, payments, chats & CI/CD	React Native, Redux Saga, GraphQL
2021	Collaboration app — Senior React Native Dev, mind maps, Kanban, legacy refactoring	React Native
2021	Freelance marketplace — Senior Vue.js Dev	Vue, Vuetify
2021	Healthcare app — Senior React Native Dev, patient-doctor matching & blockchain contracts	React Native
2020	Property rental & sales app — Senior React Dev, Google Maps	React, Redux
2020–21	Gym booking app — Senior React Native Dev, trainer chat	React Native, MobX
2020–21	Healthcare benefits platform — Front-end team lead (5+), crypto payments	React Native
2019–20	IT hiring platform — Front-end team lead	Vue.js, Vuex, Rails, PostgreSQL
2018–19	Energy device control app — React Developer, charts & tables	React.js, GraphQL
2018	Parent-teacher messaging platform — Front-end Dev	React.js, Redux, GraphQL, Relay
2017–18	Legal case management tool — Front-end Dev (Web + RN)	React.js, React Native
2017	Cryptocurrency management platform — React Dev, Tech Lead	React.js
2017	Resale marketplace app — React Native Dev (US / EU)	React Native, Redux

ALSO PROFICIENT IN

- Firebase, JavaScript (ES6), HTML5 / CSS, jQuery
- Responsive / Adaptive Design, Bootstrap, Semantic UI
- Git, BitBucket, Jira, Trello, Xcode, Zeplin

PROFESSIONAL SKILLS

- Team leadership — led teams of up to 10+ engineers
- Architecture ownership — zero-to-one through production scale
- Result-oriented delivery with clean, maintainable code

EDUCATION

M.S., Computer Science
National Technical University of Ukraine
"Kyiv Polytechnic Institute"
2007 — 2013
